DETAILED ACTION

Response to Amendment

The rejection of claim 6 under 35 U.S.C. 112 second paragraph is moot in view of applicants amendment.

The rejection of claims 1-18 under 35 U.S.C. 102(e) as being anticipated by Nambu et al, 6,1568,075 is withdrawn in view of applicants' submission of a certified translation of applicants' priority document, Japanese Patent Application No. 11-50897.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-18 are rejected under 35 U.S.C. 102(a) as being anticipated by PCT Publication No. WO98/16680, (the publication).

The publication is the International priority application of U.S. Patent 6,156,075. Accordingly, the U.S. patent serves as a translation.

The publication teaches a metal chelate forming fiber in which reactive functional groups are grafted onto a natural fiber or regenerated fiber. The grafting compound contains a glycidyl group in its molecule and the metal chelate forming compound is of the type contemplated by applicants such as ethylenediaminodiacetic acid. See column 4. Accordingly, the prior art teachings of the publication anticipate the invention as claimed in present claims 1-18.

Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Nambu et al, 6,168,863 B1 (Nambu)

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Nambu teaches metal chelate forming fibers comprising a metal chelate forming compound such as iminodiacetic acid, per claims 3-4, 10, and 12, (column 7, line 34 through column 8, line 16), bonded to natural or regenerated fibers having a reactive double bond and a functional group, such as glycidyl group, further teaching that the fiber can be filter material, as required in claims 1, 5-6, 8-9, 15 and 18. It should also be noted that Nambu teaches a method of capturing metal ions from various fluids,

including those claimed in claims 15-17. See column 4, lines 49-65 and column 19, lines 53-62.

Therefore, the prior art teachings of Nambu anticipate the invention as claimed in the present claims.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

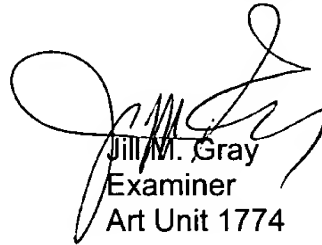

Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,168,863 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because the metal chelate forming fiber of the present invention would obviate the metal chelate fiber having an acyl group as claimed in U.S. Patent 6,168,863.

No claims are allowed.
